Master's Program Politics & Technology

- Shape our high-tech future through
- public policy and make a difference
- as innovators and thought leaders.

Bringing
Politics & Technology
together.

Specialization Areas

Specialize in Data & Society, Governance, Political Economy or Sustainability and focus on different methods.

Program Structure

SEMESTER

- | | |
|-----|---|
| I | [Introduction to Politics & Technology Methodology classes Modules from specialization |
| II | [Modules from specialization Interdisciplinary modules |
| III | [Interdisciplinary modules Political science in practice |
| IV | [Master's thesis |

Interdisciplinarity

Study at the interface of politics and technology; combine masters-level courses in political science, policy analysis and related social sciences, including applied ethics, law and economics, with course offerings from across TUM in the natural sciences, engineering, computer science and health.

Networking

Discuss the latest developments in politics and technology with innovative minds from the public and private sector at TUM Think Tank events and start building a career network.

Excellence

Benefit from being part of the Technical University of Munich, one of the world's leading research universities with committed educators and a large alumni network.

Participation

Join or set up a student initiative. We support our students in thinking outside of the box and bringing their innovative ideas to life.

Practical Training & Study Abroad

Pursue an internship, study abroad, or join a research project to gain hands-on experience and global insights, preparing you for tomorrow's job market.

Career Prospects

As a graduate of our program you have first-rate analytical and leadership skills. You can work in government and public administration from the local to the global level, in research institutes, think tanks, the media, and consulting firms, in domestic and international civil society organizations, and in the private sector.
